

Lydia DMD

Assignment 3

Webdesign 1 - Mobile Ver

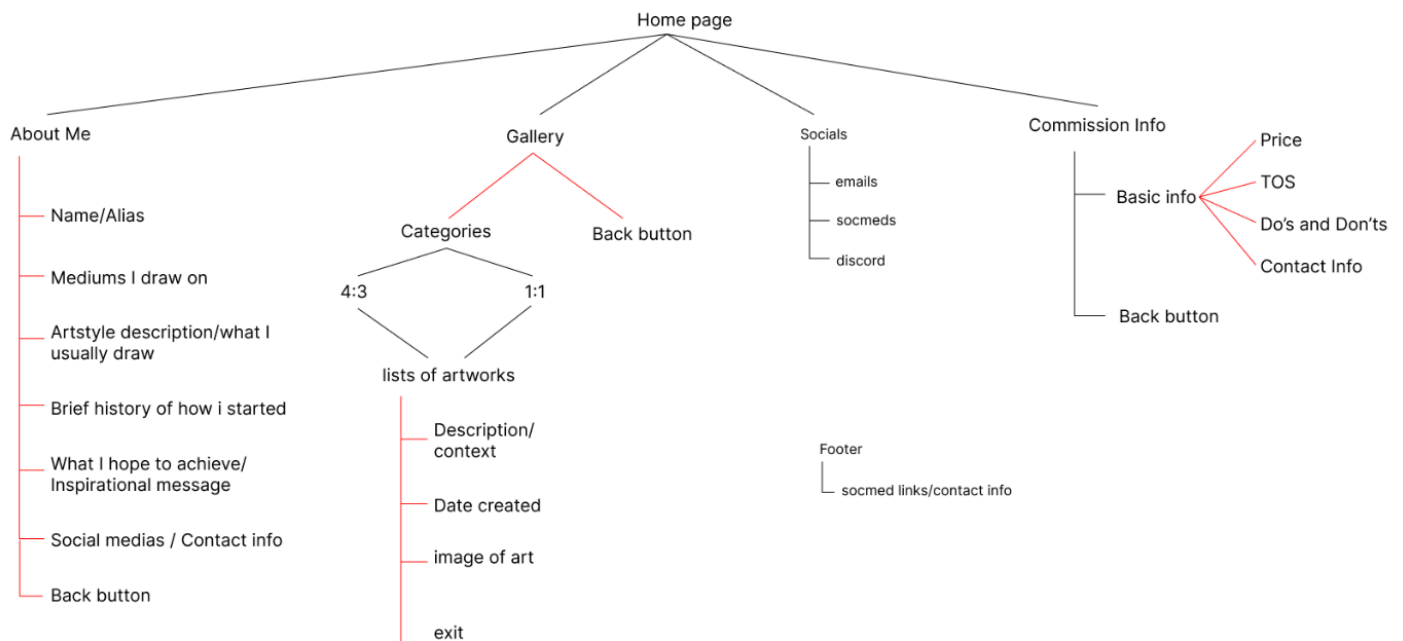

1. My project

For my project in this class, I've decided to make a personal art gallery website that allows visitors to know all about me. It will be composed of a Home page with buttons to navigate to other pages within the website; "about me", "gallery", "Socials", "Commission me". All of these are pretty self-explanatory / straightforward with its title. The vibe I wanted to go for was something akin to visual novel games, something playful.

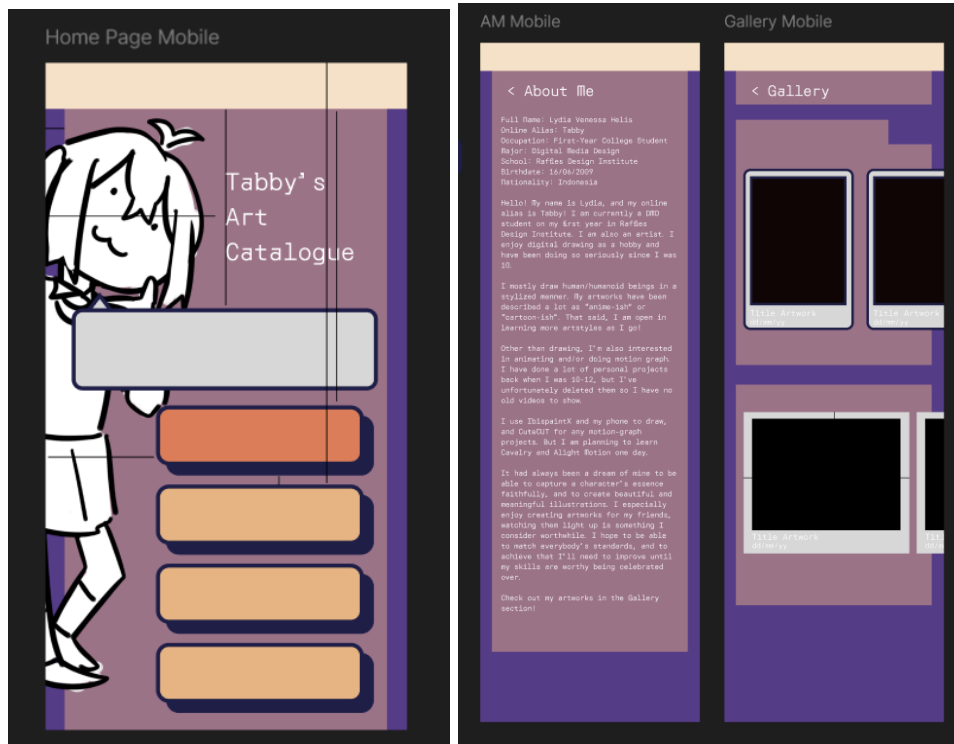

Art Catalog / Personal artist website

- Introduction/Information about myself (Name/online alias, mediums I draw on, Art-style description/what I usually draw, app I use, brief history of how it all began, my dreams/aspirations or like what I hope to achieve basically)
- Picture of myself/online persona
- Artworks (art, description/explanation/context of the piece, date created, credits (if needed), dimension/file size)
- Contact info/official social medias
- Info about commissioning

2. Wire-Framing

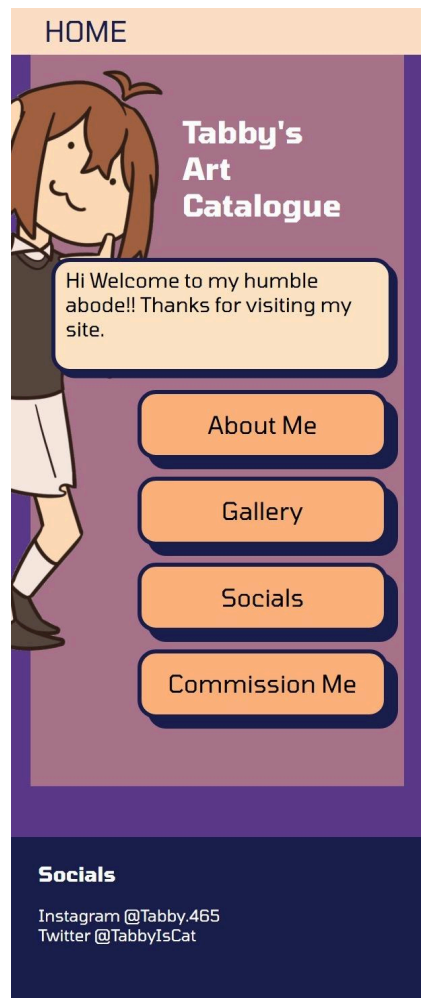

3. Initial planning in Figma

4. Documentation

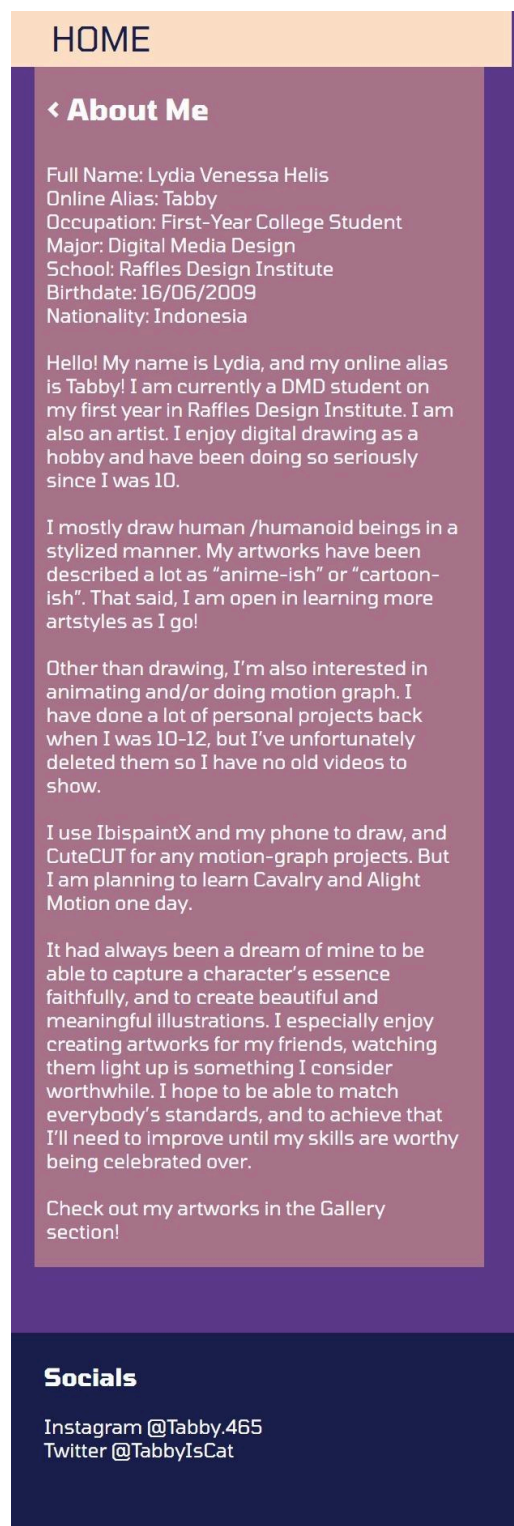

HOME PAGE mobile ver look.

Code in "index.html", styling "style.css"

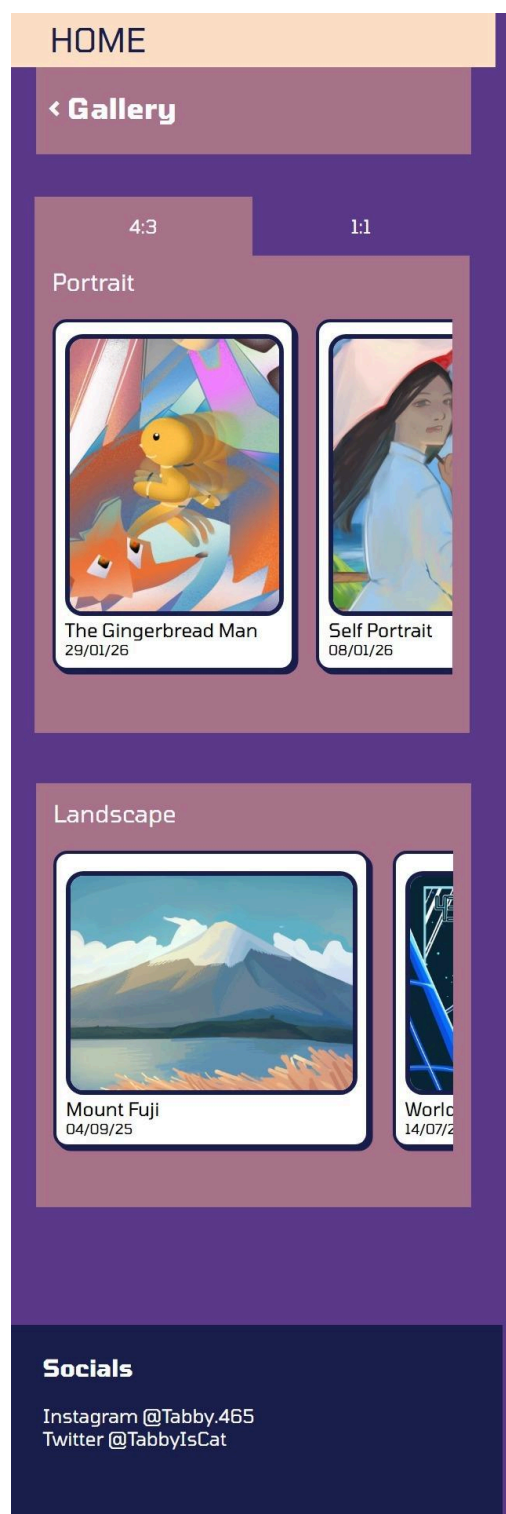

ABOUT ME mobile ver look.

Code in "AM.html", styling "style2.css"
